

To our customers and partners

Bergdietikon, March 26. 2020

## **Information regarding the situation CoVid19**

We don't want to fail to inform you about our view of the Corona crisis. The main purpose of this information is to explain to you what our behaviour and our assessments of the effects of the corona virus crisis are.

We look at the spread of the virus with concern, concern and prevention from both a human and a business perspective. Unfortunately, we cannot say what long-term effects or how long the virus will spread. We can only hope that we will find everyone back to normal everyday life as soon as possible.

The availability of our products is currently ensured and based on our current knowledge, our supply chains are intact. We are in constant, close contact with our suppliers so that we are able to react immediately to changes.

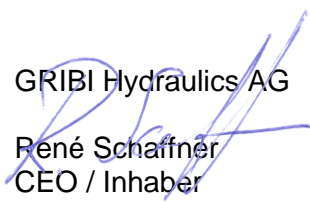

Of course, as we all know, there are changes of all kinds that we cannot influence. For example, it is possible that there may be longer waiting times at customs clearance and the delivery of required parts from abroad can be delayed.

If there are any problems with your projects, orders or orders, we will inform you immediately.

We can take full advantage of our on-site services at your location in compliance with the applicable general safety and hygiene measures.

**Call us or send us an email, we are at your disposal at any time gladly available.**
